11+ years — I design in Figma and ship in code

Design Engineer & Senior Product Designer with 11+ years across startups and global brands, working at the rare intersection of design and engineering. I design in Figma and ship the real thing in code (HTML, Sass/CSS, JavaScript), so what I prototype is what users get — nothing lost in handoff. I build and code design systems end-to-end, ground UX decisions in research over opinion, and have shipped everything from AI-powered features to a Chrome extension and responsive web apps.

EXPERIENCE

Design Engineer Jul 2024 – Present · Remote (UK)

Clockworx Business Orchestration Solutions

- Designing and shipping UI for the Business Orchestration platform and a new US e-commerce product.
- Building AI-powered features and design-system tooling directly in code.

Senior UI/UX Designer Apr 2023 – Jul 2024 · Remote (Sweden)
